RE: LADWP MANAGEMENT OF WATER RESOURCES IN MONO COUNTY

Dear Messrs. Levine and Harasick, and Ms. Edwards:

In October 2015, Mono County Supervisor Tim Alpers and I, along with County staff, met with Mr. James Yannotta and Los Angeles Department of Water and Power (LADWP) staff to discuss the need for more regular and collaborative communication. In particular, we emphasized the benefit of an early dialog and sharing of information regarding the state of the drought and its impact on the LADWP's water management decisions, particularly in Long Valley.

The Mono County Board of Supervisors is now distressed to learn via constituents, rather than the LADWP, that agricultural lessees throughout Mono County are in jeopardy of receiving reduced or no water allotments for agricultural operations. While this winter season has brought some needed drought relief, particularly in the northern portion of the state and within select watersheds statewide as evidenced by a slightly above-average spring snowpack at Mammoth Pass, we recognize the ongoing drought circumstances and the need to strategically conserve and reduce water use. We also recognize that any reductions must consider all impacts to the environment and affected parties for which the LADWP is responsible, not just those resulting from court orders and past California Environmental Quality Act (CEQA) documents. These responsibilities include both agricultural lessees and habitat health for sensitive species such as the Bi-State distinct population segment of Greater Sage-grouse (Bi-State DPS).

As stated in our letter last year, the water shutoff has the potential to cause over \$6 million of lost livestock production in Mono County and \$18 million between the two counties, with substantially greater unknown impacts related to economic activity and long-term costs to rebuild herds. We understand at least some agricultural operators in Long Valley could possibly "get by" with less water for a limited time period to meet operational needs and provide habitat stewardship.

Our understanding from our Bi-State DPS conservation partners is that the Long Valley population of sage grouse has been declining steadily during the five-year drought, which is to be expected given the cyclic nature of the species' population dynamics and climatic regimes. However, the 62% decline in strutting males since 2012 emphasizes the need to support brood-rearing habitat to ensure the recruitment of chicks into the adult

population, which historically has been a very successful life stage of the Long Valley population. The water necessary to support this healthy brood-rearing habitat would also be similar in quantity and timing to the needs of Long Valley agricultural operators with the irrigation season typically starting in mid-May or as lease conditions permit.

The Mono County Board of Supervisors desires to work collaboratively with the LADWP in the same manner that we have successfully worked with other conservation partners on the Bi-State DPS. It is worth noting that the LADWP's future is undeniably entwined with the US Fish and Wildlife Service's decision not to list the Bi-State DPS, especially without a finalized Habitat Conservation Plan. We believe collaborative engagement by the LADWP supports the Department's mission and is mutually beneficial. Mono County is willing to make the substantial effort to communicate and collaborate, and again calls upon the LADWP to do the same.

We are requesting a meeting to discuss potential options that would be mutually beneficial. Please contact me (760.914.1294, fstump@mono.ca.gov), Supervisor Alpers (760.937.0385, talpers@mono.ca.gov), or County staff Wendy Sugimura (760.924.1814, wsugimura@mono.ca.gov) to make arrangements by April 29, 2016.

Respectfully,

Fred Stump, Chair
